ISTQB Certified Tester certificate

ISTQB ADVANCED LEVEL TECHNICAL TEST ANALYST COURSE

General Description

ISTQB Advanced Level – Technical Test Analyst Course focuses specifically on technical test analyst issues such as producing test documentation in relation to technical testing, choosing and applying appropriate specification – based, structure – based, defect – based and experienced – based design techniques and specifying test cases to evaluate software characteristics.

The Advanced Level – Technical Test Analyst Qualification is aimed at people who have achieved an advanced point of their careers in software testing. This includes people in roles such as:

- Test Managers;
- Test Team Leaders;
- Development Managers;
- IT Directors;
- Project Managers;
- Quality Managers;

Main topics

- Risk – Based Testing;
- Structure – Based Testing;
- Analytical Techniques;
- Quality characteristics for Technical Testing;
- Reviews;
- Test Tools and Automation;

Benefits

At the end of the course an Advanced Level – Technical Test Analyst will be able to:

- Identify and choose appropriate test design techniques for different applications;
- Analyse internal system structure in enough detail to meet expected quality levels;
- Understand the differences between test conditions, test cases, test procedures and test scripts and identify when and when not to produce them;
- Understand and use appropriate functional – based, structural – based, defect – based and experienced – based test design techniques;
- Evaluate and apply suitable techniques to test quality characteristics such as performance, reliability, accessibility and usability;

- Application and use of keyword – driven scripting techniques for automated testing;
- At the end of the course an Advanced Level – Technical Test Analyst will be able to:

Price

Certification

The ISTQB Advanced Level – Technical Test Analyst Certification Exam has the form of a multiple-choice test that comprises of 45 questions in English. The correct answers bring one, two or three points. Each question has only one correct answer. The passing score is 65% or 52 correct answers out of 80 points and the duration of the exam is 2 hours and 30 minutes.

To take the exam, the participant must hold an ISTQB Foundation Level Certificate and is highly advisable to have at least 18 months of practical experience in the IT field.

The exam administration and acquisition of the ISTQB certificates are organized by ANIS, due to that a supplement fee is necessary.
