included

ISTQB FOUNDATION LEVEL COURSE

General Description

The course organized by ANIS in partnership with Quality House targets mainly software QA and test engineers. However, it can include other specialists or students occupied in the area of information or telecommunication technologies.

This course introduces the theory of testing, the methodology and principles of the whole test process throughout the application life cycle. It covers not only theory and terms, but also concrete methods, techniques and tools. The course gives theoretical, as well as practical knowledge, skills and trends. The course outlines the tester's activities and their role in the software development process. It explains the planning, monitoring, control and selection of approach and test methodology.

Main topics

- Fundamentals of Testing;
- Testing throughout the Software Development Life - Cycle;
- Static Testing;
- Test Techniques;
- Test Management;
- Tool Support for Testing;

Benefits

The unquestioned benefits from the course for you are:

- Promote efficient and effective communication by using a common vocabulary for software testing
- Understand fundamental concepts of testing
- Demonstrate understanding of how different development and testing practices, and different constraints on testing, may apply in optimizing testing to different contexts
- Contribute effectively in reviews and apply them
- Use established techniques for designing tests at all test levels
- Interpret, write and execute tests from given test specifications. Report the test results
- Understand test management principles for resources, strategies, planning, project control and risk management
- Write and communicate clear and understandable defect reports
- Understand the project factors that drive the test priorities and the test approach
- Understand the value the software brings to the stakeholders
- Appreciate how testing activities and work products align with project objectives and targets
- Assist in the selection and implementation process of testing tools

Price

Prices do not include VAT.

	Prices (price in euro/participant)	Foundation Level	
		Non-members	ANIS Members
Individuals	Standard Fee	550	-
Company	1-4 participants	550	495
	5 - 9 participants	520	470
	+ 10 participants	495	445

* The participation fee includes: the course support and the adjacent materials, coffee breaks and lunch during the training days.

** For the course sessions that are not held in Bucharest, an additional fee of 50 Eur + VAT/participant will be charged. The fee covers transport and accommodation costs, as well as other logistical expenses.

Certification

The Course (methodology and working materials) complies with ISTQB requirements (International Software Testing and Qualifications Board – www.istqb.org), covers the ISTQB Foundation Syllabus and is accredited by SEETB (South East European Testing Board – www.seetb.org).

Those wishing can take an additional exam for receiving an international ISTQB Certified Tester certificate.

The exam is in digital format, in English and consists of 40 questions. Each question has only one correct answer. Passing score – 65% or 26 correct answers. The duration of the exam is 75 minutes.

The exam administration and acquisition of the ISTQB certificates are organized by ANIS, due to that a supplement fee is necessary.
